County of Putnam chooses Tadiran Solutions

Tadiran Telecom Government Systems teamed up with NYC-based Partner Steadfast Telecommunications to win the opportunity to implement new telecommunications for the County of Putnam New York's operations. 15 locations, most with Coral IPx Office's (and many with expansion cabinets) and the popular T208 IP telephones will seamlessly connect county employees as if they were in a single office. The county's requirements mandated no single point of failure and the flexibility to operate using existing infrastructure in some locations. The Coral IPx was simply more flexible and adaptable to the county's needs than the 20 other companies and other finalist, Cisco.

Steadfast was able to uncover the opportunity and develop a relationship locally with the County, while Tadiran's Government team provided the knowledge and experience to navigate the complex RFP process and requirements as well as to provide Project Management to roll-out the services which is currently under-way.

July Newsletter

Tadiran Talk will give you more information about Tadiran's continued success around the world.
